The Pan-European **citizen-centric** movement

Tomorrow's politics, **today**

[www.volteuropa.org](http://www.volteuropa.org)

After BREXIT, citizens were concerned by the increasingly divisive and destructive trend in politics.

The risk of being taken back to the chaos of the past, by rising nationalist movements, was ever more present.

Because of this, people from across Europe came together and created

**Volt**

with **no money** and **no political names**

## Why 5+1?

The first **5 challenges** will be adapted to the national level, taking into account local realities. These first **5 challenges** provide guidelines to all Volt Chapters, and do not only deal with European competences.

Our **+1 challenge** - a proposal to reform and strengthen the EU - will be identical and harmonious across all our national programmes.
